Professional Experience

PossaCode Community   📍 Brazzaville, Congo
Training Manager   Feb 2024 – present

Frontend Developer   JavaScript   React   NextJS   Tailwindcss

- I am responsible for organizing internal training sessions aimed at enhancing the skills of community members in emerging technologies. My role involves selecting trainers and ensuring they have a strong foundation to effectively impart their knowledge to participants.
- Additionally, I also handle training for members in modern JavaScript and React.

Central Universal Scientific Library (ЦУНБ)   📍 Ivanovo, Russia
Stage   Jan 2023 – Mar 2023

UI / UX designer   Frontend Developer   HTML   CSS   JavaScript

- Analysis of the library's official website, proposal of a layout that reveals the design of a modern website adapted for the library.
- Made suggestions and fix bugs on different pages of then website.
- Lead a team of 3 students on the creation on the project

HTML Template Developer   📍 online
Freelance   2021 – present

HTML   CSS   JavaScript   ReactJs   TailwindCss   Astro

- Offer services in the design of website, portfolio, landing page and blog in full HTML / CSS and JavaScript with responsive design.
- Contributed as a front dev in the creation of the UI of a social network between friends.

Personal Projects

Marico   🔗 github.com/marico

React   Protect Routes   yup   TypeScript   Tailwindcss

- Marico is a platform that allows users to build an online audience and promote their content by increasing their visibility.
- This project uses yup to validate registration and login forms. It also utilizes react-router-dom to facilitate navigation between pages and protect routes for non-connected users.

React PhoneBook   🔗 github.com/react-phonebook

React   TypeScript   Tailwindcss   LocalStorage   Zustand   Zod

- React PhoneBook is an application that allows users to register contacts in an address book.
- In this project, I use React for creating the user interface, Zod for form validation, Zustand for state management, and localStorage for storing contacts.

Robbie Lens Photography   🔗 github.com/robbie_lens

TypeScript   gsap   SASS   GoogleSheet   Google App Script

- Robbie Lens is a photography portfolio website showcasing the work of Robbie Lens, including rates and the content of his work.
- I integrated Google Apps Script into this project to retrieve the information entered by visitors in the form and store it in real time in Google Sheets.
